

Scale Electric Models

Parts Sets include laser cut parts in graded balsa and plywood, plus a full size plan. All shaped balsa and plywood parts are accurately laser cut, including wing ribs, formers with intricate stringer slots, bulkheads, shaped trailing edges (FokkerDVII), tailplane parts, control horns, cabane struts, plus many smaller parts.

Scale Electric Models

Our new range of electric scale models has been designed exclusively for Belair Kits by Peter Rake and suit 400 size brushless motors and mini radio equipment. The detailed plans are CAD drawn ensuring the highest accuracy and the all wood traditional construction builds into a lightweight, strong airframe. All designs are proven designs with good flying characteristics.
